## **Baseball/Softball Field Safety and Maintenance Checklist**

Prior to practice or a game, assess the following field characteristics and make the necessary corrections to the statements marked, 'No/Needs Attn' before allowing players on the field. If your field is experiencing major problems, including excessive wear, drainage issues, design flaws, etc., contact the STMA at ph. 800-323-3875, or STMAinfo@STMA.org for a referral to a local STMA chapter volunteer in your area for advice.

Sk Yes	inned Are		Comments			
		The soil is not too loose and provides good running traction.				
		The soil surface is loose enough around sliding zones for safe sliding.				
		The soil is not too abrasive for safe sliding.	Pitcher's Mound			
		The soil is not too compacted to provide good drainage.	Yes No/Needs Attn			
		Running paths and sliding zones near bases are level and not worn.			The mound conforms to league requirements.	
	٥	Batter's box and home plate areas are in good condition.			Platform area behind the rubber is large enough.	
		Pitcher's mound is in good condition.			"Push off" and "landing" areas are	
		The skinned area is level and does not have low spots or holes.			constructed with specialized clay.  "Push-off" and "landing" areas are
