3. Apply specific sequencing rules as required by the conventions and Official Coding Guidelines.

4. Explain coding of diagnoses of infections, neoplasms, endocrine disorders such as diabetes, anemias, mental disorders, and the nervous system.

5. Explain coding of diagnoses of cardio respiratory illnesses, cerebrovascular disease and GI & GU disorders.

This Course explores intermediate concepts in each chapter of the ICD-10-CM coding manual with chapter specific guidelines and lots of examples to increase your skills, proficiency, speed and accuracy in choosing the appropriate ICD-10 codes. Attendees will be able to demonstrate proficiency in complex coding scenarios and be ready to tackle home care charts back at the agency. We'll also apply OASIS C-1/ICD-10-CM coding data items to scenarios so that home health participants will understand payment implications and compliance issues.
