Code

What can you do to prepare?

- Examine relevant ICD-10 codes now.
- You don't need to use all 68,000 codes; your practice will most likely use a very small subset of codes.
- As with ICD-9, an alphabetic index and electronic tools are available to help with code selection.
- Electronic health record (EHR) solutions with intelligent, auto-coding can generate the appropriate code.
- Examples of commonly used diagnosis codes*:
