

Minnesota School Bus Driver Shortage

Minnesota is facing its most significant school bus driver shortage in recent history.

- As the 2016-2017 school year begins, Minnesota is in need of thousands of school bus drivers to get children to school safely each day.
- Nearly every school district in the state is facing a bus driver shortage. Some districts need a handful of new drivers, while others need more than 100.
- School districts are required by state law to provide transportation to all students who live more than two miles from their school. A lack of school bus drivers would require other district employees – such as mechanics or administrators – to be pulled off their jobs to drive buses.
- A lack of school bus drivers would likely result in fewer afterschool activities and canceled field trips.

Become a driver in 14 days.

Those wanting to become a driver could complete the following steps in just two weeks.

- Pass a physical, drug test, and background check
- Pass knowledge tests for commercial licensing
- Hold a commercial learners permit for 14 days
- Complete behind the wheel training
- Pass a behind-the-wheel test

School bus driving is a fulfilling profession.

- Each day, Minnesota school bus drivers safely transport more than 760,000 students to and from school.
- Bus drivers can be powerful mentors. They are the only school officials who see children every day of the school year, and can be a positive influence to a student's education experience.
- Bus driving is an ideal profession for retirees who love to spend time with young people, parents who want to mirror their children's schedules recent college graduates, and self-employed people looking for extra income.
- On average, bus drivers work 15-30 hours per week, with flexible scheduling.
- School bus contractors are careful to hire good, qualified people to become bus drivers.
- In addition to commercial bus driving training, drivers must pass a fitness exam, ongoing criminal background checks, and drug and alcohol testing.
- Being a bus driver today is very different from how adults remember it as students. Most of today's buses are equipped with GPS technology, cameras, improved ceiling acoustics, and pollution control equipment.
